PRICES F. O. B. WORTHINGTON

TERMS: Cash with order. C. O. D. orders require one-third cash in advance.

Small orders will be sent parcel post.

Large orders sent by express collect.

PLANTING HINTS

Plant strawberries 15 to 18 inches apart in row for June bearing types and 12 to 15 inches for ever-bearers, with rows 3 or 3½ feet apart. Plant in well drained and well prepared soil. Set crown of plant about even with soil. Do not cover crown with soil. Mulch strawberries about middle of November with 2 or 3 inches of straw.

Plant raspberries 2 feet apart in the row with rows wide enough to suit your method of cultivation. Mulch of straw or other coarse material is good after plants are established. Support is not necessary if you prune every year.

Grapes 6 to 8 feet apart in row.

Dwarf apples 6 to 10 feet apart.

Standard apples 20 to 40 feet apart.

Peach 15 to 20 feet apart.

Plant peaches and cherries in well drained soil. Add humus such as peat or rotted manure to soil for planting fruit trees. Dig hole large enough to accommodate all roots. Do not plant too deep. On standard fruit trees put the graft an inch or so below ground level, on dwarf trees above ground level.

STRAWBERRY PLANTS

We specialize in the newer disease resistant varieties. It pays to plant red stele resistant kinds, but if conditions are right, good results are obtained from non-resistant varieties.

Virus free plants grow and produce much better especially in varieties like Sparkle.

Plants marked ★ are red stele resistant.

Plants marked * are grown from virus free stock.

Sparkle * ★ Virus free Sparkle should not be compared with standard Sparkle as the yield is much heavier. Quality is the same sparkling red and sweet. Recommended by Ohio Experiment Station. Midseason, good freezer.

Vermilion * ★ Red stele resistant. Yield is extremely heavy, 100 qts. from 50 plants in our own test 1953. Very high quality.

STELEMASTER * ★ New U. S. D. A. variety. Early good quality, disease resistant. Highly recommended.

TEMPLE ★ Early.

ROBINSON * New giant size. Early to midseason.

PREMIER * The standard early bearing strawberry.

ARMORE: * Another new heavy yielding variety. Out produced 60 others in actual growing tests. Very good freezer in Ohio tests.

CATSKILL. * Virus Free. Midseason, good yielder now that it is virus free. Excellent flavor.

TENNESSEE BEAUTY * Late.

BLAKEMORE * Early.

SENATOR DUNLAP * Early and sweet.
